

Placement instructions

We congratulate you on purchasing the **tontraeger.audio** „reference stand for HARBETH“.

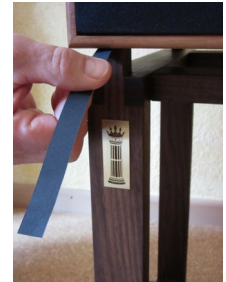

For the best results we recommend placing your stands on a slate plate (or other suitable stone plate)

fig.1

The stands are produced in very high precision. If, nevertheless the stands are not stable, use thin paperstrips to balance it. Generally one layer of paper is sufficient. Otherwise the paper must be folded once or more. (paperstrips are included with delivery)

fig.2+3

The loudspeaker should be positioned so that the back cover of the loudspeaker is flush with the edge of the stand.

fig.4

By using the adjustment plates the stands can be aligned horizontally. Hold the adjustment plates on the left and the right side of the stand. Then move the loudspeaker until the edge of the speaker cabinet is in line with the adjustment plates. (adjustment plates are included with delivery)

Fig.5

Enjoy the listening pleasure with **tontraeger.audio** „reference stand for HARBETH“
